

REVISED AMENDMENT

In the Claims

Please substitute the following amended claims 1 for the corresponding claim that appears in a Response to an Examiner's Action filed on July 22, 2002.

1. (Amended) A bioelectric simulating fishhook comprising:
a shank having an eye formed at an end thereof, the eye
adapting the fishhook for coupling to a fishing line;
a bend formed at an end of the shank distal from the eye;
a point formed at an end of the bend distal from the shank;
and
a self-contained bioelectric simulating means which, to induce
a strike response in fish, includes an electret and is disposed on
the shank.

REMARKS

The October 9, 2002, Office Communication states that a Response to an Examiner's Action that was filed with the United States Patent and Trademark Office ("USPTO") on July 22, 2002, was not fully responsive to an Office Action mailed February 13, 2002, because claim 1 in the response filed July 22, 2002, was marked to show amendment of the claims.

Transmitted herewith is a word-for-word copy of amended claim 1 from the Response filed July 22, 2002, from which all marks indicating changes have been removed. The Applicant respectfully
